

A Breezy Eatery

Phantom's motorized screens complement an open-air Japanese brasserie in Boston, MA

"Phantom's motorized screens with 58% openness maintain great visibility to the outside, allowing guests to enjoy views of the busy neighborhood."

- LOCATION:** Boston, Massachusetts
- ARCHITECT:** Harry Lowd, Office dA
- PRODUCT:** Phantom Executive™ motorized retractable screens
- MESH TYPE:** Fiberglass 18/14 mesh
- NEED:** The restaurant owners were looking for a screen that would let fresh air in and keep bugs out. To meet health codes, they required a barrier separating the dining area from outside.
- SOLUTION:** Phantom's motorized screens with 58% openness maintain great visibility to the outside, allowing guests to enjoy views of the busy neighborhood.

OVERVIEW

Basho, a Japanese brasserie, was opened in May 2010 in Boston's busy Fenway neighborhood. Located on Boylston Street close to Fenway Park, the owners wanted to create an outdoor dining space that connected their guests to the popular neighborhood. Two large folding wall systems were installed on the front of the restaurant allowing for guests to enjoy the sights and sounds of the bustling area on a hot summer's day or after a Boston Red Sox baseball game.

The screens they selected stop diners from freely walking in and out of the dining area and also keeps the open-air restaurant in line with local health codes. According to the architect, "one of the main reasons for specifying Phantom's retractable screens was the option of choosing screens that allowed to cover 22 foot openings."

APPLICATION HIGHLIGHTS

Enjoy the breeze without the bugs

The retractable screens feature Phifer 18/14 insect mesh with 58% openness, allowing guests to enjoy the breeze without having to worry about insects.

Easy to operate

The screens retract completely out of sight at the convenient touch of a button on a remote control or smart phone device.

Complements any space

Motorized screens by Phantom blend with the architectural design and décor of the restaurant and can easily retract out of sight into their housings when not in use.
