

The Forever House

Phantom's motorized screens selected for ocean-side home on Vancouver Island

"It is with great pleasure that we write to thank you for fitting our waterfront living area with your motorized screens. Our screened deck has enabled us to live the West Coast outdoors dream. We spend more time outside than we had ever thought possible!"

- Forever House homeowner

LOCATION:	Ladysmith, Vancouver Island, BC
STYLE:	Craftsman
BUILDER:	Palladian Project Management
PRODUCT:	Phantom Executive™ motorized retractable screens
MESH TYPE:	Tuff Screen
NEED:	Due to a severe bee allergy in the family, the homeowners needed a screen solution for their deck that would provide insect protection without having to give up their luxurious ocean side view.
SOLUTION:	Phantom's motorized retractable screens with 45% openness complement the design of their deck, provide a clear view the ocean, and keep out the unwanted bees.

OVERVIEW

Located in Ladysmith on Vancouver Island, this beautiful ocean side home features a large outdoor patio perfect for entertaining guests in the summer. The homeowners needed screens for their deck to protect a member of the family who was highly allergic to bee and wasp stings. They did not want to give up their spectacular ocean view, and were eager to find non-permanent screens that could be stored out of sight when the bees were not in season.

By installing Phantom's motorized screens, the family can now transform their outdoor living area to fit their needs. When in use, the screens offer a safe haven from the bees, 55% sun control and UV blockage, all while maintaining a good view to the water.

APPLICATION HIGHLIGHTS

Enjoy the view without the bees

The durable retractable screens with 45% openness allow the family to enjoy their ocean view without having to worry about getting stung.

Easy to operate

The screens can be lowered by the simple press of a button on a remote control or smart phone device.

Complements any space

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view. This way the screens don't distract from the design and decor of the deck.
